Luminous Garden
Beth Galston

Reception Sunday, March 26, 1:00-3:00 p.m.
On view from March 26-July 16, 2017

Sculptor and conceptual artist Beth Galston creates site-based installations that are informed by many sources, including science, architecture, engineering and nature. The immersive environment of Luminous Garden (Aerial) is an ephemeral light piece made of tiny yellow LEDs set in cast resin acorn caps.

Supported in part through a gift from David & Mara Sfara to underwrite exhibits in The Lab.
